-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Claims 1-17 are pending. Claims 8-13 are withdrawn from consideration. The art rejections based on US# 6,210,843 are withdrawn in view of Applicant's remarks. The 112 rejections are withdrawn in view of Applicant's cancellation of the claim.

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 and 14-17 are rejected under 35 U.S.C. 102(e) as being anticipated by US# 5,989,754 to Chen et al.

Chen teaches a photomask. The mask prevents the reticle patterns of a photomask from peeling caused by electrostatic discharge damage. The photomask includes: a substrate; a plurality of metal shielding layers formed on the surface of the substrate to provide the reticle patterns, wherein each two of the metal shielding layers are spaced apart by a clear scribe line; and a plurality of metal lines formed on the clear scribe line to connect the adjacent metal shielding layers, thereby increasing the effective surface area of the reticle patterns (Abstract). Therefore, Chen teaches defining in the mask a constant width etch band delineating individual conductor elements in the circuit conductor pattern. The band is less than 30 microns wide (col.

4, lines 31-33). As shown in the figures, the conductor regions and spaces between the conductor regions are also less than 30 microns wide.

### *Response to Arguments*

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### *Conclusion*
